**Subject:** Techalloy July 2016 Monthly Progress Report

John--I have reviewed the July 2016 Monthly Progress Report for the Techalloy Facility in Union, Illinois. I have a couple minor comments.

Progress Made...: water-level readings reported by the transducer should be adjusted in future to be within about 0.02 ft of the manual measurement. Moving the transducer slightly (about 0.08 ft) should take care of the issue.

Semiannual RCRA Monitoring...: Text should be changed to "1,1,1-TCA was found at 0.006 percent of the MCL and TCE was found at 0.1 percent of the MCL."
